Subject: Some pre-emptive work for my next mental health tribunal hearing !!!!

Please request an “**objective explanation**”; from my treating doctors; as to why they believe that they should have total control over me; or, to put it another way; why they should have anything to do with me at all !!!!

As I understand that your hearings are all about the validation of the conduct of the medical profession; I have decided my future attendance at your hearings to be redundant, and henceforth will leave the validation of the doctor’s treatment; of me, up to the two of you !!!!

However, I still expect you to perform your most basic of functions and “**objectively analyse**” their response as they try to justify themselves; or, in other words; provide the most basic of explanations which is in fact the fundamental human right of all mental patients !!!!

As I have actively resisted all engagement with the medical profession; as they attempt to make their problem mine; a good starting point; for you; would be to ask them; just what “**objective factors**” did they use when making their offending decision to triple my medication !!!!

P.S.

Please consider this email to be a formal request for a statement of the “**objective reasons**” used to make my next mental health tribunal hearing determination !!!!
