Sadly, this is one of those problems that does not have a positive solution. Nuclear weapons under the control of South Korea is definitely a negative outcome. If Trump permits the U.S. to act on the global stage for the supposed global good we must remember the U.S. nearly went to war in the 60's when a nuclear power was about to appear on its doorstep. Personally, I take issue with those who say conventional deterrence is failing. There is no need to deter someone who claims ( as a sane mind must ) their nukes are for self-defence !!!!

## South Korean Nuclear Proponents: Conventional Deterrence is Failing

They say in the face of North Korean threats, Seoul cannot leave its fate in the hands of the US or China
