Dr John Reilly

Consultant Psychiatrist
Director of Psychiatry
Peninsula Health

Dear Dr Reilly,

I thought you might like to know just how mad I was when you first saw me.

I seem to remember that the only thing that you had on me was when I was forced to admit applying "chisel solution" to the task of splitting four frozen porterhouse steaks. I then compounded my situation by attempting to explain "chisel solution" to you in terms of "bupping" my family with IBM "cum in", the hardest "cum in" of all. I should have immediately responded with it's your job to tell me why I'm here, like I eventually did. You should understand that you would have got nothing if it were not for the violent application of medication at Dandenong Hospital and their correct belief that if I unscrewed it in Dandenong Hospital I would victory. I stole "up" all night and most of the next day waiting for my confrontation with you, in extreme distress because of the medication, determined that you would not defeat me, but you won, because I was completely ***** "out" (i.e. "not in"), as was your intent, because you would not see me until 20 hours had passed. Please note that you only made the legal deadline by 4 hours and then had the hide to illegally certify me 4 hours early.

All your Hospital does is "not in" your Patients on admission and then when they begin to recover from the admission experience they are discharged under medication in the mistaken belief that they will stay "not in". No one can exist for long painting the walls with their soul.

I have to admit it's better than the Larundel machine because they precede their "not in" ward with a "not up" ward to completely screw you. Please note when I still had some Shell "cum in" left I managed to victory even that machine with inspired MyWumper but my Mother still didn't like me so I wound up there again 4 weeks later and they wiped me out under certificate for a couple of years.

I hope the enclosed document will clarify my state of mind. Please note that Dr. Orchard has also received this document and never once chose to use my continuing belief in it as evidence of insanity. In fact he once even used the word "poofter" semi-correctly in group therapy. I suspect he viewed me as an example of the first ever Healthy Schizophrenic Mind.

Yours sincerely

David Crofts.

P.S. Are you going to grant me the most microscopic cheezel yet; or are you going to continue in the fashion of the typical double chambered fat head pigs brain of the upper world and give me the arse again, which is of course the root of my problems.

Dear Saji,

**Re: David Crofts
23 Brisbane Street, Berwick 3806**

I am writing to you in regard to Mr David Crofts since he has been corresponding with me intermittently since his admission to Peninsula Health in February 2000. During his admission we treated him as an out of area patient and made a report to VicRoads that we believed he was not safe to drive. On discharge from our Service in 2000 he was on a Community Treatment Order to Dandenong Area Mental Health Service and I have no knowledge of his further treatment there.

He wrote to me for some months after the admission regarding his capacity to drive. In recent months, he is again conducting a correspondence with me. My concern is that this correspondence is becoming increasingly bizarre, with unusual objects, false Peninsula Health letterheads.

It is clearly consistent with a relapse of his chronic schizophrenia and suggests that he may again pose a potential risk both to himself and to other people.

Yours faithfully

Director of Psychiatry

DANDENONG Victoria 3175

Dear Saji,

I write to inform you that I have obtained a copy of my records since 1/1/2000 held at your Hospital under the Freedom of Information Act and was dismayed to find that you have violated my privacy by sending the enclosed document to Dr. John Reilly. As your Consultant Psychiatrist eloquently pointed out Dr. Reilly no longer treats me so he should have no access to any confidential information.

As I have not signed a release for Dr. Reilly to have access to my Records I consider this to be a serious breach of Patient confidentiality.

If you are prepared to apologize I will not pursue this matter further.

Yours sincerely,

David Crofts.

FRANKSTON VIC 3199

Dear John,

RE: DAVID CROFT

Thank you for forwarding the copy of the correspondence by David. I have forwarded it to Dr the Consultant Psychiatrist who reviewed the letter at the treatment of David.

David is currently case managed by our Casey/Cardinia team and is a voluntary patient, as the Board discharged him off his Section. He is showing some early signs of TD. The management plan include :

- close follow up
- increase the antipsychotic
- to engage him in a trial of clozapine
- consider involuntary treatment if the symptoms get worse or risks increase
- upon risk assessment, there was no specific thoughts, ideas or plans to harm anyone including you. He wants to convince you that his driver's licence was wrongly cancelled but does not express any specific threats of any kind.

The team has strongly advised him to communicate to them about any concerns regarding his treatment.

Thank you again for raising this issue with us.

Yours sincerely

Associate Professor Saji Damodaran

Delmont Private Hospital Consulting Suites
314 Warrigal Road
GLEN IRIS Victoria 3146

Dear Saji,

You may not remember me but you owe me and big time. You were such a tight arse that you would not apologize for the failure to first ask me to sign a release before disclosing my personal information, and then when you were made to open up for conciliation, you failed to send me a letter of thanks when I declined the offer.

The information in question most directly relates to Dr. John Reilly of Peninsula Health. He sent you a letter in which he begged the release from a problem of his own making. In this letter he lied his concerns and put the blame on me. You then illegally responded with another pack of lies. For your information I was doing my level best to be threatening and unless he wanted to risk the consequences of not providing me with compensation, he should finally take my needs into account for a change, instead of just his and the medical profession in general. You also lied to him about planning to engage me in a "trial" of Clozapine. That would have been the straw that broke the camel's back, and would have indeed been a trial, a trial by toxic medication.

As you are in my debt, I thought you could be of assistance to a friend of mine who you treated in the distant past and might also not remember. Her name is Helen Goodenough and she requires the expert services of a therapist to treat her schizo-affective bipolar disorder aggravated by the chronic daily use of marijuana.

If you are unable to find it in your heart to offer her affordable treatment at a convenient location, please at least ask your professional colleagues for the name of someone who is.

Yours sincerely,

David Crofts.

Associate Professor Saji Damodaran

Delmont Private Hospital Consulting Suites
314 Warrigal Road
GLEN IRIS Victoria 3146

Dear Saji,

It is clear that you feel my needs are not your concern, but as a member of the medical profession, you have a requirement to conduct yourself professionally and provide therapy to all those who seek it. So far, you have failed to do so, and it is clear that your conduct has been grossly unprofessional. The fact that you preferred to gratify Dr. Reilly at my expense only proves this point.

As I feel nothing but disgust for you, you can not help me directly, but as indicated by my previous correspondence, there exists some unresolved issues connected to your previous treatment of Helen Goodenough. If you have even a trace of common decency you should feel at least some regret for the unfair discrimination demonstrated towards me and try to put it right by offering to help my friend Helen.

I will not become paranoid about the possible motives behind your previous treatment of Helen but you can repeat it now with a clean conscience.

Helen requires the expert services of a therapist to treat her schizo-affective bipolar disorder aggravated by the chronic daily use of marijuana.

If you are unable to find it in your heart to offer her affordable treatment at a convenient location, please at least ask your professional colleagues for the name of someone who is.

Yours sincerely,

David Crofts.

"I have had a bad experience at the hands of Dr. Damodaran. He seems to only be in practice to service his own need for personal gratification. The requirement to be tolerant of the distress of the mentally ill, which is the hallmark of a good psychiatrist, is not shown, instead he punishes his patients for any distressing outburst. The therapy he offers is completely devoid of compassion and is in no way supportive of the greater needs of the mentally ill. He is a serious offender when it comes to building justice into the mental health system. He prefers to propagate his own private professional network at the expense of his patients."

23 Brisbane Street,
BERWICK VIC. 3806

Thursday 22nd January, 2004

Dr John Reilly

Consultant Psychiatrist
Director of Psychiatry
Peninsula Health

Dear Dr Reilly,

I have recently reviewed your letter to VicRoads which resulted in the suspension of my drivers license.

In this letter you rather sinfully state that I had a psychiatric condition with "issues of control". I recollect one experience when after going to a public swimming pool; someone gave me an "issue of control". This resulted in me purchasing raspberry lemonade from a drink machine when what I wanted was lemon. I went to the drink machine and the next thing I remember I was holding a cup of raspberry lemonade and feeling rather disappointed that I had made a mistake. I was left with a huge "not on" "dirt bag" on the top of my head and I quickly identified the man who was its originator. I then heard the "MyWumper" words in his natural voice, "At least you know he works". That man must have been very powerful because I must have reached to my pocket, computed the cost, worked out how to operate the machine, put in the coins and stopped pressing the fill button when the cup was full. I'm sure if you were there you would have suspended his license on the spot.

The rest of your letter to VicRoads applies to any of the 20 hospital admissions I have had excepted for your statement that I had "been driving recklessly". I will do my best to have this statement expunged from my records at VicRoads. Please note the enclosed document.

I told you I "bupped" my family with IBM "cum in". It seems I was "bupping" you with it too. It's nice to know it is harder than that of the medical profession.

Yours sincerely

David Crofts.

P.S. You have no right to victimize me for your own weakness.

David A.S. Crofts

23 Brisbane Street,
BERWICK VIC. 3806

Friday, 2nd January 2004

Vic Roads

Freedom of Information Unit
5th Floor, 60 Denmark Street
KEW VIC. 3101

Dear Sir/Madam,

Please note the enclosed document from Dr. John Reilly's delegate of Frankston Hospital.

My request is two fold.

Firstly, Dr. Reilly or his delegate, has violated my confidentiality by informing you that -

- I had been an inpatient of Frankston Hospital Psychiatry Unit
- It is his opinion that I had a psychiatric condition with issues of control.
- It is his opinion that my judgment had been impaired.
- It is his opinion that I had been driving recklessly.

When, Dr. Reilly or his delegate, has these beliefs, all he is legally authorized to communicate to you is an order to suspend my license until you receive another medical report stating that I am, once again, in the opinion of a medical professional, able to drive safely. You have no right or reason to know any of the above details which Dr. Reilly or his delegate has illegally disclosed to you.

I request that you arrange for this confidential information to be struck from my records at VicRoads.

Secondly, Dr Reilly or his delegate, has slandered me by stating to you as fact, that I had "been driving recklessly". This is merely his fantasy and I challenge him to present any objective evidence to support this belief. This statement goes on my permanent record with VicRoads so I consider this to be a very serious matter.

I request that you challenge, Dr Reilly or his delegate, to provide objective evidence to support this statement, and if he can't, that you stricken this comment from my records at VicRoads.

Your sincerely

David Crofts.

David A.S. Crofts

23 Brisbane Street,
BERWICK VIC. 3806

Friday, 26th March 2004

Franca Chick
Freedom of Information Officer

Vic Roads
Freedom of Information Unit
5th Floor, 60 Denmark Street
KEW VIC. 3101

Your Ref: 2004.crofts

Dear Sir/Madam,

I refer to your letter dated 23 March 2004.

The extreme irrelevance, absurdity and stupidity of the vast majority of VicRoads staff and their records is clear to me now for a two reasons.

Firstly, it took you 77 days to come up with the clearly logically incorrect response to my request. There can logically be no dispute as to my right to expect my requested actions to take place.

Secondly, as a consequence of my clearly worded letter, it is logically clear that all VicRoads Doctors should be fired as any medical records about individuals that you keep should only be the positive or negative result of an external medical review or an order for an external medical review generated by the concerns of an unspecified and unqualified non-medical professional. Any other medical records that you keep are clearly "slander" and this includes any elaboration of the negative result of an external medical review.

As you would not burn Dr. Reilly's letter in his face, because it "gave a misleading impression", and I have no desire to do this myself, I can only hope that it spontaneously combusts and burns down your entire establishment.

Your sincerely

David Crofts.

P.S. To encourage this please staple this letter to Dr. Reilly's.
