

A Crap Particle is called into existence when the mind in absolute isolation has complete knowledge of a discrete entity through all time. One could think of this as a formula exists in which time is an unconstrained variable and position is a variable that can be computed from the point of view of the mind in absolute isolation.

Observations

- The "Uncertainty Principle", in modern physics, happily allows, reality as we know it, to exist when "MOMENTUM" and "POSITION" are 2 "fundamental" qualities, related only through a "rule" involving the "fundamental" constant "h" or "Planck's constant".
- I propose, reality as we know it, can happily exist, when one mirrors the "Uncertainty Principle", except using "TIME" and "POSITION" as the 2 "fundamental" qualities, related only through a "rule" involving the "fundamental" constant "c" or "the speed of light".
- **When the "POSITION" of a "discrete entity" does not "vary" with "TIME", instead of its uncertainty in "TIME" being considered infinite, we consider it's "ENERGY" to be expressed as "MATTER".**
- **In our Universe, the "fundamental" qualities "POSITION" and "TIME" "initially" did not "vary" with respect to each other for all "discrete entity" in it.**
- This "initial" "condition" gives additional support for my proposition to use "POSITION" and "TIME" when mirroring the "Uncertainty Principle".
- This relationship between "POSITION" and "TIME" is reflected in the "fundamental" constant "c" or "the speed of light" and suggests that "initially" all "ENERGY" was expressed "ELECTRO-MAGNETICALLY" as indicated by our detection of microwave background radiation.
- The "UNIT" for the first two of the (4 "discrete fundamental long") is (Time per Distance), and all four are suggestive of "ELECTRIC" and "MAGNETIC" fields.
