- David Crofts Please embrace a philosophical position that can successfully gratify her needs as you perform a clear demonstration of the fact that you understand yourself to have one and only one well understood knob concept. When you finally manage to provide her with the gratification she needs, both male and female will then experience the release of escape from the constraints of existence only inside a world where terror dominates and all correspondence, regardless of whether it originates from male or female, is flooded with fear. My philosophical position is to feel the sound of her heart beat felt in the fat-profit-inner-fat-profit-ear !!!! 5 days ago
